Professional Experience

Cognizant   2021 Nov – 2024 Apr
Programmer Analyst   Noida, India

- Improved the order tracking interface of B2B Ecommerce Platform, allowing users to easily monitor the status and progress of their orders.
- Identified and resolved various bugs in both the frontend and backend to enhance platform stability and reliability.
- Conducted thorough testing for new features and bug fixes to ensure they meet the required standards and specifications.
- Participated in regular sprint planning and retrospective meetings to ensure alignment and continuous improvement.

Education

Bachelor of Technology - Information Technology   2018 – 2021
J.C. Bose University of Science & Technology, YMCA   Faridabad, India
CGPA: 7.8

Diploma - Computer Engineering   2014 – 2017
Ambedkar Institute of Technology   Delhi, India
Percentage: 70.4

Projects

CoWrite - Real Time Document Editor ⎘
Technologies Used: React JS, Material UI, Node JS, Socket IO, MongoDB, QuillJS │ GitHub ⎘

- Developed a web application similar to Google Docs that allows users to write and format text directly in the browser.
- The application supports rich text formatting, including bold, underline, strikethrough, headings, lists, and changing text color and background color.
- Generates a unique ID for each new document, mapping and storing data in the database.

Code Craft - Interactive Code Playground ⎘
Technologies Used: React JS, Tailwind CSS, CodeMirror │ GitHub ⎘

- Developed a responsive web-based code playground similar to CodePen that allows users to write and instantly preview HTML, CSS, and JavaScript code.
- Ensures a seamless user experience across various devices and screen sizes.
- Enhanced coding experience with features like syntax highlighting and auto-completion.

Skills
